1 Comments: Why do we as a society have to take risks that may cause harm to our environment and our health? I was diagnosed with cancer in August/98, I'm 28 yrs old today; my cancer could of been the result of harmful toxins, which changed our environment. Please do not imbalance our environment, or take risks that may harm the environment-in-turn-harms-life. We all have to share this planet, so in turn give respect to yourself as well as to the society in whole. Take these toxins somewhere eles.
